

LSV-D92R

Supplementary Fig. 4. Conserved region of designed primer location in partial coat protein sequence alignment of lily symptomless virus (LSV). Sequences with green highlight represent primer, while sequence with yellow highlight represents probe. TGBp1, triple gene block protein1; TGBp2, triple gene block protein2; TGBp3, triple gene block protein3; CP, coat protein; ORF6, open reading frame 6.
